

Low Cost, High Innovation Efficiency in the Built Environment

Brandon Fletcher, CFA
Co-Founder Green Analytics

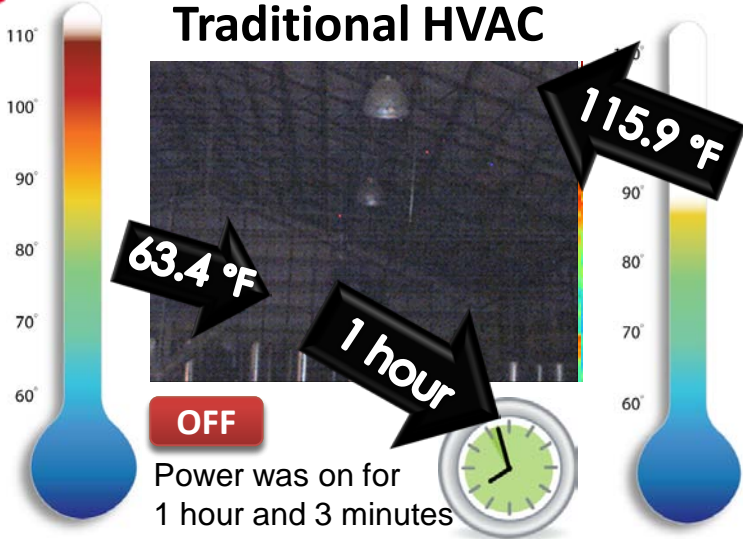

COENCO®

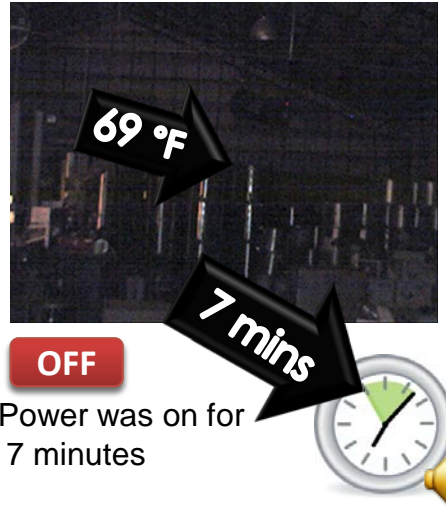

BIG IDEA: Efficiently mixing air in interior spaces dramatically reduces the energy needed to heat and cool

Side by side studies prove effectiveness; only difference is the air movers

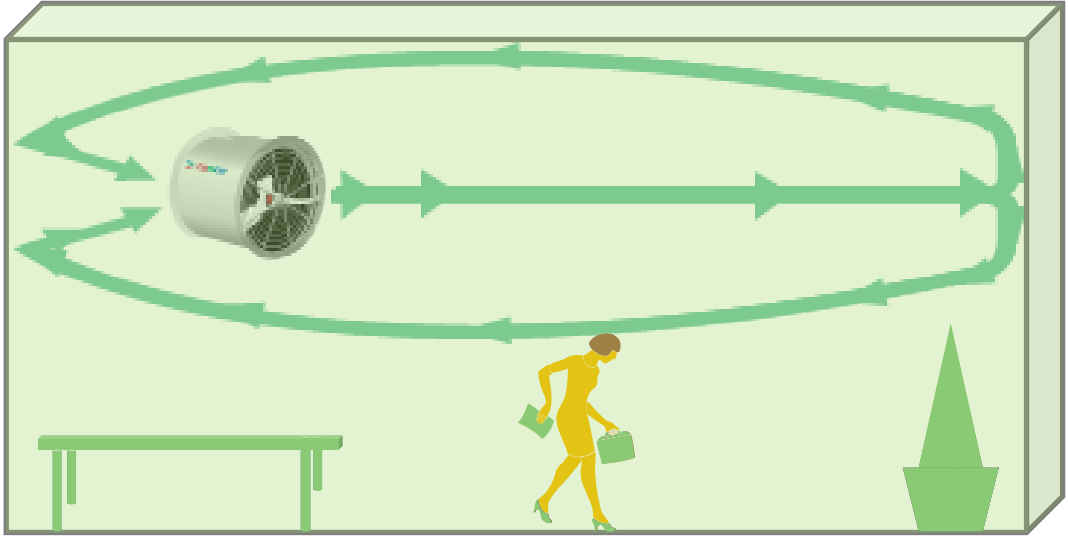

Traditional HVAC

COENCO®

BIG IDEA: Cycling the systems builds a thermal bank that uses lights, people, everything to balance out the energy need

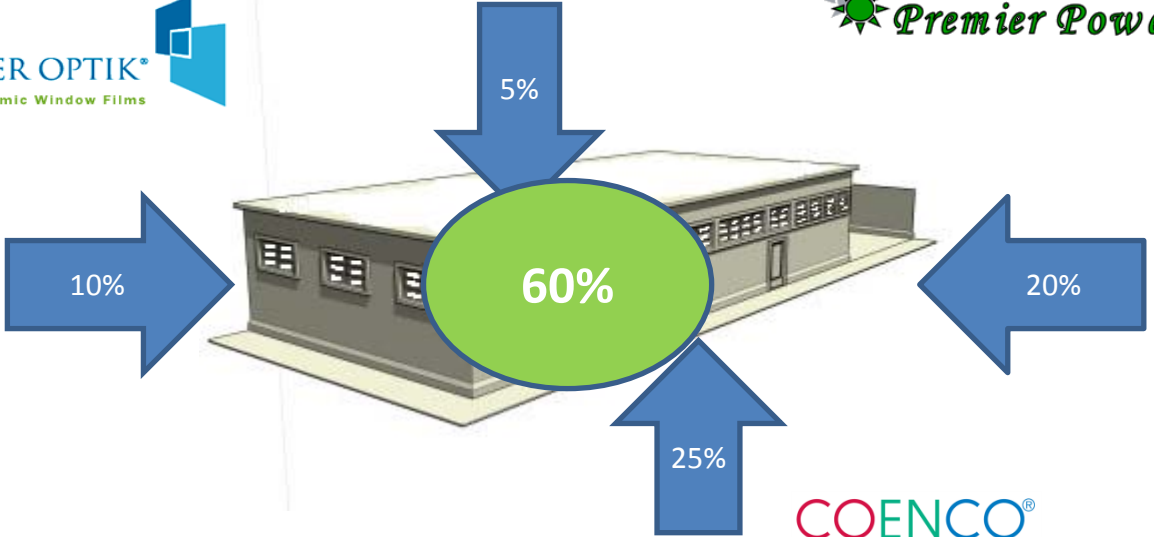

BIGGER IDEA: With uniform temperature in the building, other energy solutions work even better to save up to 60%

ROOF COOL II

 *Premier Power*

HÜPER OPTIK®
Nano Ceramic Window Films

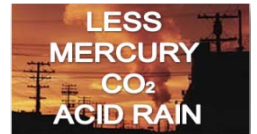

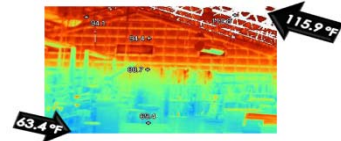

COENCO®

BIG WINS: Reducing energy waste in any interior space has positive financial, environmental, and social benefits

- **Reduction in Operating Cost**
Old HVAC wastefully heats ceilings and cools floors
- **Asset Protection**
Thermal stresses destroy equipment and structures
- **Sustainability**
Lower energy load makes 100% local solar/wind workable
- **Associate Comfort**
Work environment is improved with lower turnover in industrial and warehouse environments

BIG CLIENTS: Our system and air movers succeed in many industries for most building types on three continents

- | | |
|-------------------------|--------|
| Manufacturing | US |
| Distribution Centers | UK |
| Food Processing | China |
| Sports Arenas and Pools | Mexico |
| Retail Stores | Brazil |
| Offices and Homes | India |
| Hotels | |
| Animal Centers | |

BIG ADVANTAGES: Flexibility of air mover placement and accurate analytics enable higher efficiency and control

Green Analytics Enables:

- 3rd Party Finance
- Custom Models
- Optimization
- Accountability

small price: Small companies have limited overhead and our simple, elegant solutions have low material cost

Energy efficiency investments are often the highest return investments our clients have ever made

Please contact us at your earliest convenience to schedule your free facility evaluation.
